EDUCATION

Arizona State University - B.S. in Computational Mathematical Sciences December 2025 | GPA: 4.00

- Relevant Coursework: Applied Statistics, Data Analytics, Programming Languages, Data Analysis in R & Python, Data Visualization in Tableau
- Honors: Dean's List (2023-2025), Joaquin Bustoz Memorial Scholar (2025)

Baseball Operations Experience

Sun Devil Athletics – Baseball Student Manager (Analytics) Tempe, AZ | Sept 2025 - Present

- Operate TrackMan and Edgertonic systems during practices and games to capture pitch metrics, including velocity, spin rate, movement profiles, and hitting performance data
- Manage game-day data capture workflows, ensuring accurate collection and distribution of performance data to coaching staff
- Develop advanced scouting reports using Python and R to analyze opponent tendencies, pitch usage patterns, and matchup insights for game preparation
- Translate analytical outputs into actionable insights for coaches and players, supporting player development and training adjustments
- Support day-to-day baseball operations, including data organization, technology setup, and analytics support for the coaching staff

Baseball Analytics Projects

Pitching Performance Analysis Project

- Analyzed Statcast data to evaluate pitch characteristics and performance indicators for Zac Gallen
- Built Python workflows analyzing relationships between velocity, spin efficiency, and strikeout rate
- Developed visualizations identifying predictors of pitch effectiveness

Pitch Classification Model

- Built a Python machine learning pipeline predicting pitch type from live pitch metrics
- Implemented staged classification (Fastball / Breaking Ball / Offspeed) before deeper model training
- Trained models on engineered Statcast data capturing pitch movement physics

Analytics & Research Experience

Handshake Move – Research Fellow

Remote | July 2025 - Aug 2025

- Processed and validated structured datasets used to evaluate AI model accuracy
- Conducted data validation and quality control workflows to improve dataset reliability

Joaquin Bustoz Math-Science Honors Program – Mathematics Tutor

Tempe, AZ | May 2025 - July 2025

- Tutored high school students in Calculus II and Differential Equations
- Strengthened ability to translate complex quantitative concepts into understandable insights

Baseball Technology & Analytics Skills

Baseball Technology: Trackman, Edgertonic, Video Analysis Systems, Pitch Tracking Technology, Performance Data Capture

Programming & Data Analysis: Python, R, SQL (basic), Tableau, Excel, Jupyter Notebook

Baseball Operations Competencies: Player Development Support, Advanced Scouting, Game Preparation, Performance Analysis, Data Visualization

Languages: Spanish (Professional Working Proficiency)

Professional Interests

Baseball Analytics | Player Development | Pitch Design | Baseball Technology | Performance Analysis
